The following is a complete listing of all claims in the application, with an indication of the status of each:

Listing of claims:

1 1. (currently amended) A communication device, comprising:
2 a key-input section in which key operations are ~~implemented~~ input by
3 a user;
4 a key-operation storing section for storing key-input information input
5 in said key-input section;
6 a display section for displaying said key-input information, which has
7 been stored in said key-operation storing section;
8 a non-volatile memory section for storing as an operational procedure
9 key-input information selected by the user with the use of said key-input
10 section from said key-input information displayed on said display section as a
11 series of ~~combination of~~ key-input information; and
12 a control section for executing said operational procedure by
13 sequentially executing said selected series of key-input information, which has
14 been stored in said non-volatile memory section as ~~said series~~ a sequence of
15 ~~combination of key-input information~~ combinations of keys.

1 2. (currently amended) A communication device as claimed in claim 1,
2 wherein:
3 said display section displays said key-input information in accordance
4 with ~~such an~~ order that said key-input information was stored in said
5 key-operation storing section.

1 3. (currently amended) A communication device as claimed in claim 1,
2 wherein:
3 said key-input information in the form of said selected series of
4 ~~combination~~ is stored in said non-volatile memory section in a condition in
5 which a functional name has been assigned to said key-input information.

1 4. (currently amended) A communication device as claimed in claim 2,
2 wherein:
3 said key-input information in the form of said selected series of
4 ~~combination~~ is stored in said non-volatile memory section in a condition in
5 which a functional name has been assigned to said key-input information.

1 5. (currently amended) A communication device as claimed in claim 1,
2 wherein:
3 said key-input information in the form of said selected series of
4 ~~combination~~ is allocated to a softkey disposed in said key-input section to be
5 enrolled.

1 6. (currently amended) A communication device as claimed in claim 2,
2 wherein:
3 said key-input information in the form of said selected series of
4 ~~combination~~ is allocated to a softkey disposed in said key-input section to be
5 enrolled.

1 7. (currently amended) A communication device as claimed in claim 3,
2 wherein:

3 said key-input information in the form of said selected series of
4 ~~combination~~ is allocated to a softkey disposed in said key-input section to be
5 enrolled.

1 8. (currently amended) A communication device as claimed in claim 1,
2 wherein:

3 said control section makes a display of an indication for confirming
4 whether execution of said key-input information is to be started or not on said
5 display section before executing sequentially said key-input information in the
6 form of said selected series of combination, and said execution of the
7 key-input information is started in the case where there was such an input by a
8 user through said key-input section to the effect that said execution of the
9 key-input information should be started ~~by a user through said key-input~~
10 section.

1 9. (currently amended) A communication device as claimed in claim 2,
2 wherein:

3 said control section makes a display of an indication for confirming
4 whether execution of said key-input information is to be started or not on said
5 display section before executing sequentially said key-input information in the
6 form of said selected series of combination, and said execution of the
7 key-input information is started in the case where there was such an input by a
8 user through said key-input section to the effect that said execution of the
9 key-input information should be started ~~by a user through said key-input~~
10 section.

1 10. (currently amended) A communication device as claimed in claim 3,
2 wherein:

3 said control section makes a display of an indication for confirming
4 whether execution of said key-input information is to be started or not on said
5 display section before executing sequentially said key-input information in the
6 form of said selected series-of-combination, and said execution of the
7 key-input information is started in the case where there was such an input by a
8 user through said key-input section to the effect that said execution of the
9 key-input information should be started ~~by a user through said key-input~~
10 section.

9 key-input information should be started ~~by a user through said key-input~~
10 ~~section.~~

1 13. (currently amended) A communication device as claimed in claim 1,
2 wherein:
3 a capability for transmitting and receiving e-mail is involved, and said
4 key-input information in the form of said selected ~~series-of-combination~~
5 relates to an operational procedure for transmission and/or reception of e-mail.

1 14. (currently amended) A communication device as claimed in claim 2,
2 wherein:
3 a capability for transmitting and receiving e-mail is involved, and said
4 key-input information in the form of said selected ~~series-of-combination~~
5 relates to an operational procedure for transmission and/or reception of e-mail.

1 15. (currently amended) A communication device as claimed in claim 3,
2 wherein:
3 a capability for transmitting and receiving e-mail is involved, and said
4 key-input information in the form of said selected ~~series-of-combination~~
5 relates to an operational procedure for transmission and/or reception of e-mail.

1 16. (currently amended) A communication device as claimed in claim 4,
2 wherein:
3 a capability for transmitting and receiving e-mail is involved, and said
4 key-input information in the form of said selected ~~series-of-combination~~
5 relates to an operational procedure for transmission and/or reception of e-mail.

1 17. (currently amended) A communication device as claimed in claim 8,
2 wherein:
3 a capability for transmitting and receiving e-mail is involved, and said
4 key-input information in the form of said selected series-~~of combination~~
5 relates to an operational procedure for transmission and/or reception of e-mail.

1 18. (currently amended) A communication device as claimed in claim 1,
2 wherein:
3 a capability for linking to Internet is involved, and said key-input
4 information in the form of said selected series-~~of combination~~ relates to an
5 operational procedure for accessing to a specific site on Internet.
